

## CAPABILITY STATEMENT

### Core Competencies

Redline is a unique consulting business specialising in client side capital intensive projects for manufacturing industries located in Australia. Redline provides a range of professional services to assist their clients in both project development and execution.

Specialising in portfolio/project management and project engineering for manufacturing covering factory buildings, automated process and packaging equipment, services and automated warehousing.

Redline uses the well renown PMBOK® methodology from the Project Management Institute (PMI) to deliver successful projects.

Redline project services can assist your project in all areas to ensure successful delivery. The depth of the engagement is governed by the client.
